To Whom It May Concern

**Ref:- Bould Consulting Ltd**

We engaged the company Bould Consulting Ltd to assist us with our insurance claim with Nagico Insurance in October 2017 after we were hit by Hurricane Irma in the British Virgin Islands.

We found them to be professional and had the credibility and knowledge required for the task. They responded quickly to our questions and enquiries and produced a quality report of our property status and insurance claim parameters.

They assisted us most ably when our insurance company would not pay out in a timely and proper manner. The claim was eventually settled some nine months later with the help of Martyn Bould and his team after very difficult negotiations with an obstructive insurance company.

We recommend them to you for assistance in preparing a claim, advising you and representing you and helping deliver an appropriate settlement should you need to make a claim with an insurance company.
